## Professional Summary

Backend Python Developer with strong expertise in designing and developing scalable web applications using Python, FastAPI, Django, Flask, and RESTful APIs. Proficient in crafting responsive frontend interfaces using JavaScript (ES6+) and React. Experienced in relational database modeling with MySQL, PostgreSQL, and SQLite, query optimization, and session/JWT authentication. Skilled in building maintainable modular architectures, improving system performance, and collaborating in Agile software development environments.

## Projects

### SwiftKart – Full-Stack E-Commerce Web Application

- Developed an end-to-end e-commerce platform pairing a Python REST API backend with a responsive React and JavaScript user interface.
- Implemented dynamic multi-parameter catalog search and filtering, achieving sub-20ms query response latency.
- Designed normalized relational database schemas with foreign-key constraints to guarantee ACID transaction consistency during cart checkout.
- Engineered modular endpoint routing, session state management, and optimized API payloads for enhanced performance.

**Tech Stack:** Python, FastAPI, Flask, React, JavaScript, SQLite, REST APIs

### StockFlow – Enterprise Inventory & Supply Chain System

- Engineered a centralized multi-warehouse inventory tracking platform using Python and Django ORM.
- Implemented automated low-stock predictive threshold alerts and replenishment triggers, reducing stockout delays.
- Developed Role-Based Access Control (RBAC) and secure session management distinguishing operators, managers, and administrators.
- Created dynamic analytics dashboards using JavaScript and optimized Django querysets with database indexing for high throughput.

**Tech Stack:** Python, Django, Django REST Framework, PostgreSQL, MySQL, JavaScript

### VidSnap – Media Processing & Content Automation Pipeline

- Developed a modular Flask backend orchestrating end-to-end media automation, audio-video synchronization, and FFmpeg rendering.
- Implemented backend logic for handling user requests, chunked file uploads, processing workflows, and serving output media.
- Built dynamic Jinja2 templates and interactive JavaScript gallery modules for real-time asset preview and download.

**Tech Stack:** Python, Flask, FFmpeg, REST APIs, HTML, CSS, JavaScript, Jinja2

### TaskFlow Pro – Full-Stack Task & Sprint Management Application

- Developed a full-stack task management web application using Python and Flask with clean architectural separation.
- Implemented secure user authentication, password hashing, and session management for multi-user task isolation.
- Engineered comprehensive CRUD workflows for prioritizing tasks, tracking sprint status, and organizing deadlines.
- Utilized Flask Blueprints and Jinja2 templates for structured backend routing and responsive dynamic web views.

**Tech Stack:** Python, Flask, Jinja2, SQLite, MySQL, HTML, CSS, JavaScript

## Technical Skills

| | |
|---|---|
| **Programming Languages:** | Python, JavaScript (ES6+), C |
| **Backend Frameworks:** | FastAPI, Django, Flask, REST APIs, Microservices Architecture |
| **Frontend Technologies:** | React, JavaScript, HTML, CSS |
| **Databases:** | MySQL, PostgreSQL, SQLite, Django ORM, SQLAlchemy |
| **API Tools:** | Postman, Swagger, OpenAPI |
| **DevOps & Tools:** | Git, GitHub, Docker, Linux, VS Code |
| **Core Concepts:** | OOPs, DBMS, Exception Handling, File Handling, Agile Methodologies |

## Education

Sep 2024 – Jun 2026 **Master of Computer Application (MCA)**
Institute of Engineering and Technology (IET), Lucknow

Aug 2019 – Jun 2022 **Bachelor of Computer Application (BCA)**
Babasaheb Bhimrao Ambedkar University (BBAU), Lucknow
